

*Operated by Lark Hospitality*

We at the Old Mill Inn & Spa are making a conscious decision on how we are doing business today to impact the world tomorrow. Over the past few years, we have been developing and promoting policies to reduce our impact on our Environment.

The following **environmental initiatives** have been implemented at the Old Mill Inn & Spa:

### **LIGHTING:**

- Replacement of incandescent light bulbs with energy saving bulbs in the guest bedrooms.
- Replacement of fluorescent lighting to electronic ballast fluorescent lighting in kitchen, back hallways, and storerooms.
- Installation of light sensors to control outdoor lighting.
- Installation of motion sensors in smaller meeting rooms, washrooms, and storerooms.

### **ENERGY SAVINGS:**

- Implementation of Johnson Energy Management System for heating and air conditioning.
- Installation of digital thermostats in guest rooms with programmable set back heating and cooling temperatures.
- Installation of electronic pilots on gas stoves to encourage chefs to turn off gas.

### **WATER SAVINGS:**

- Replacement of traditional toilet tanks with “low consumption” water saver flush tanks in public washrooms.
- Introduction of water saver flush tanks “low consumption” in guest rooms.
